

An initiative contributing

One planet
live with care

This material belongs to the project "Encourage young specialists to boost agri-food value chains and build sustainable business models" And it was designed by

AWHHE

CENTRO
DE ENERGÍA

**Encouraging
young
specialists to
power the
agri-food
value chains
and building
sustainable
business
models**

*“Together with our
young specialists
build a sustainable
future”*

The overall objective of this initiative is to promote healthier lifestyles and enhance the agri-food value chain through the development of sustainable business models and to encourage young specialists to build capacity together with Armenian rural communities

To achieve this objective, the following three activities are being developed

“Changes are built on collaboration and sustainability”

MICROPILOT

Solak's Sustainable Irrigation Station

COURSE

Powering agri-food value chains with sustainable energy and business models

BUSSINES MODEL

Technical and economic proposal
